

An Open and Shut Case for Natural Ventilation and Sustainability

Securistyle Limited is one of the world's largest manufacturers of window and door hardware. Services include comprehensive technical support, on site inspections and 12 year audited warranty schemes.

Natural Ventilation and Sustainability - Opening solutions for natural ventilation continue to be incorporated into the World's most prestigious commercial building projects. Most recently the Federation Towers project in Moscow and the new Queen Elizabeth Hospital in Birmingham are fitted with parallel opening system technology that is truly state of the art. Serving such regular clients as Permasteelisa, Yuan Da, Technal, etc, Securistyle's architectural services include an in-house technical team plus customer service engineers dealing with customer queries, world wide.

An Open and Shut Case for Natural Ventilation and Sustainability

- A brief walk through the standards which pertain for opening solutions for naturally ventilated buildings.
- In-depth information about many aspects of natural ventilation with added emphasis on green issues and provides help in formulating strategies for creating more sustainable buildings.
- Ways to achieve safe effective smoke evacuation through the curtain wall which help the fire fighter to perform more efficiently.
- New opportunities to influence the aesthetics of a building through the informed choice of different designs for openings within the curtain wall.

Learning aims - This seminar will assist the Architect when designing buildings to meet the latest legislation for safety and smoke evacuation whilst providing, technologically advanced, sustainable environments.

Duration – 30-45 minutes with time for questions and answers
